PROFILE

Full-stack developer with 2 years of production experience. Currently at Sagelyn AI, an AI-powered social media management SaaS: primary developer on the React + TypeScript frontend and sole owner of a Python microservice and its AWS infrastructure. Depth in social platform API integrations and Python serverless delivery.

EXPERIENCE

Full-Stack Developer — Sagelyn AI

Mar 2026 – Present

app.sagelyn.ai — AI-powered social media management platform (multi-tenant SaaS)

- Stack:** React / Next.js / TypeScript · Python on Lambda · FastAPI + Docker on App Runner · DynamoDB · AWS SAM · Bedrock (Claude) & OpenAI
- **Frontend ownership** — primary developer on the React 18 / TypeScript application: Tailwind CSS, Chakra UI and MUI, Cognito authentication via AWS Amplify, consuming a 16-service API layer spread across five repositories.
 - **Social platform integrations** — built and hardened OAuth 2.0 connection flows for six providers (Facebook, Instagram, LinkedIn, YouTube, Google My Business, WordPress), including single-use CSRF state validation and redirect allowlisting on every provider.
 - **Post scheduling** — shipped timezone-aware scheduling end to end across the frontend and three Python Lambda services, backed by 160+ new unit tests and released to production.
 - **Analytics rebuild** — rebuilt the dashboard with per-platform collection, live polling of collection status and a new LinkedIn collector; fixed published-date semantics that had been silently emptying the dashboard for all tenants.
 - **Security remediation** — led hardening of the social-management service — tenant authorisation on every customer-scoped route (IDOR), an SSRF-safe fetch helper, CORS allowlists and log hygiene; ~98 tests green across 7 branches.
 - **Infrastructure ownership** — own that service's AWS SAM / CloudFormation stack: Lambda, API Gateway, DynamoDB, SQS, EventBridge, Step Functions, Secrets Manager, Route 53 and IAM service roles, deployed to separate dev and production accounts via GitHub Actions; also packaged FastAPI services with Docker on AWS App Runner.
 - **AI features** — integrated Amazon Bedrock (Claude, chat and vision) and OpenAI for AI-assisted content generation, with embeddings / RAG retrieval over stored content and Firecrawl-based web scraping for source material.

Web Developer — CYTECH International

Nov 2025 – Feb 2026

Full-time in-house developer delivering client-facing web features.

Backend / Laravel Developer — Freelance & Contract

2023 – 2025

- Delivered multiple SaaS products in Laravel and native PHP — including a multi-tenant architecture and four outsourced client projects end to end — plus an IoT-enabled Laravel platform integrating GPS hardware with a live web dashboard.

Part-Time Programmer — Satit Bilingual School, Rangsit University (Thailand)

2024

- Automated school administrative workflows with Google Apps Script and Google Workspace integrations.

Freelance Full-Stack Developer (MERN)

2022 – 2023

- Built MERN-stack applications with third-party API integrations for small-business clients.

TECHNICAL SKILLS

Specialisation	Social platform APIs & OAuth 2.0 (Meta, Instagram, LinkedIn, YouTube, GMB, WordPress) · multi-tenant SaaS · AI agent workflows
Frontend	React 18, TypeScript, Next.js (App Router), React Router, Tailwind CSS, Chakra UI, MUI, Redux, Zustand, Angular
Backend	Python (AWS Lambda), FastAPI, Docker, REST API design, Laravel, native PHP, Django, Node.js
AWS	Lambda, API Gateway, DynamoDB, S3, SQS, EventBridge, Step Functions, Cognito, Secrets Manager, Route 53, IAM, App Runner, Amplify, SAM / CloudFormation (multi-account)
AI	Amazon Bedrock (Claude — chat & vision), OpenAI, Gemini, Perplexity, Firecrawl, embeddings / RAG, vector stores
Databases	DynamoDB, PostgreSQL, MySQL, MongoDB
Practices	Infrastructure-as-code, GitHub Actions CI/CD, application security (IDOR / SSRF / CSRF), unit testing (pytest, Jest), Git

EDUCATION & LANGUAGES

BS Information Technology — Bukidnon State University

2021 – 2025

- Capstone: IoT visitor-monitoring system using GPS tracking — selected by the university for patent filing.

Languages: Cebuano (native) · Filipino · English — professional working proficiency, used daily in written and spoken work.
